Professional Summary

Computer Science graduate with hands-on experience in IT operations, cloud infrastructure, automation, and application troubleshooting using AWS, Linux, Terraform, Ansible, Jenkins, and Kubernetes. Strong analytical and problem-solving skills with exposure to ITSM, monitoring, and AI-assisted support operations.

Core Skills

- **Cloud (AWS):** EC2, VPC, S3, RDS, IAM, Route 53, Auto Scaling, ELB, ECR, EKS, Lambda
- **DevOps Tools:** Git, GitHub, Jenkins, Docker, Kubernetes, Helm, GitHub Actions
- **Automated Monitoring:** CloudWatch, CloudTrail, Grafana, Prometheus — supporting IT systems uptime
- **Containers:** Docker, Kubernetes, Helm
- **Languages/Tools:** Java, Linux, Git/GitHub
- **AI Tools:** Claude AI, Cursor, Jira Service Management AI, Amazon Q Developer, ServiceNow Now Assist

Experience

Amazon Web Services – AWS and DevOps Intern [Jan 2026 – Apr 2026]

- Provisioned 10+ AWS resources via Terraform (IaC), cutting manual setup effort by 70% and improving IT systems reliability.
- Configured Linux EC2 instances with Ansible playbooks, lowering setup time by 60% — comparable to reducing repetitive, ticket-driven operational work through automation.

Tech Citi Technologies Pvt Ltd, Bengaluru – AI/ML Intern [Aug 2023 – Sep 2023]

- Completed a Machine Learning internship involving Python, machine learning libraries, frameworks, and multiple algorithms.
- Worked with data preprocessing, model training, and evaluation while developing a structured approach to technical problem solving.
- Gained practical exposure to analyzing technical issues and contributing to the implementation of machine learning solutions.

Projects

3-Tier Web Application Architecture, AWS

- Designed a 3-tier web application using AWS EC2, RDS, ELB, and Auto Scaling for scalable application deployment.
- Configured AWS IAM roles and Security Groups to manage access and secure application environments.
- Implemented load balancing and fault tolerance to improve application availability and reliability.

CI/CD Pipeline — Jenkins, Docker, Kubernetes, AWS

- Built an end-to-end automation pipeline (Jenkins, Docker, GitHub, Kubernetes, EC2), cutting deployment time by 75%.
- Streamlined build validation and version control by integrating Git, GitHub, and Jenkins automation.
- Deployed containerized apps via Helm, improving consistency and reducing manual errors across environments.

Infrastructure Deployment — Terraform & Ansible

- Automated AWS VPC, EC2, and networking infrastructure provisioning using Terraform.
- Configured Linux servers, packages, and user accounts using Ansible playbooks.
- Standardized infrastructure configuration and deployment to reduce manual administration.

Education

SDM Institute of Technology, Ujire — B.E. Computer Science, CGPA 6.5 May 2024
P.P.K Science College, Ankola — Pre-University, 63.66% Mar 2020
Rotary Kannada Medium High School, Mundgod — Secondary, 68.32% Apr 2018

Certifications

- AWS Cloud Practitioner Essentials — Amazon Web Services
- Introduction to Kubernetes — SimpliLearn
