PROFESSIONAL SUMMARY

As a Computer Science graduate specializing in AWS and DevOps, I have developed a strong foundation in cloud computing and CI/CD concepts. I am eager to apply my knowledge to develop and manage scalable and secure cloud solutions. I am committed to leveraging automation tools to enhance efficiency and drive innovation.

SKILLS

- Cloud Platform:** AWS (VPC, EC2, S3, RDS, Route 53, IAM)
- DevOps Tools:** Jenkins, Docker, Kubernetes, Ansible, Terraform
- Programming Language:** Java SQL
- Other Technologies:** Linux, Git and GitHub

INTERNSHIP AND EXPERIENCE

Amazon skill builder

Online

AWS and DevOps Trainee

- Completed comprehensive training in AWS and DevOps, focusing on cloud infrastructure management, process automation, and CI/CD pipeline implementation.
- Gained hands-on experience with key technologies including AWS services, Linux, shell scripting, Git, Jenkins, Docker, Kubernetes, Ansible, Terraform, Grafana, and Prometheus.

Tech Citi Technologies Pvt Ltd

Bengaluru

AI/ML Student Intern

Aug 2023 – Sep 2023

- Completed a Machine Learning internship, gaining hands-on experience with Python, machine learning libraries, frameworks, and various algorithms.
- Developed skills in data preprocessing, model training, and evaluation, contributing to the successful implementation of machine learning solutions.

EDUCATION

SDM Institute of Technology

Ujire, India

Bachelor of Computer Science and Engineering; CGPA: 6.5

May 2024

P.P.K Science College

Ankola, India

Pre-University Education; Percentage: 63.66

March 2020

Rotary Kannada Medium High School

Mundgod, India

Secondary Education; Percentage: 68.32

April 2018

PROJECTS

3-Tier Web Application Architecture on AWS

- Developed a scalable 3-tier architecture using AWS services like EC2, RDS, and ELB to ensure high availability.
- Configured detailed IAM roles and security groups, enabling 5 distinct teams to operate within secure, isolated network environments without compromising collaboration.
- Enhanced application performance and fault tolerance by implementing intelligent auto-scaling and load balancing strategies, reducing average response latency by 30%..

CI/CD Pipeline with Jenkins, Docker, Kubernetes, and AWS

- Developed a CI/CD pipeline using Jenkins, Docker, Kubernetes, and AWS EC2 to automate builds and deployments.
- Integrated GitHub for version control, enabling seamless source code management and automated testing.
- Deployed applications to Kubernetes clusters using Helm charts for scalable management.

AWS Infrastructure Deployment with Terraform and Ansible

- Designed and Deployed AWS infrastructure using Terraform to automate the provisioning of resources.
- Configured servers with Ansible to maintain consistent environments and streamline deployments.
- Automated infrastructure and configuration management, enhancing scalability and operational efficiency.

CERTIFICATIONS

- Amazon Web Services:** AWS Cloud Practitioner Essentials
- SimpliLearn:** Introduction to Kubernetes
